Pumping station name

Grid coordinates

Wessex Water site I.D
(to be confirmed)

6 Handover information (to be completed by Wessex Water)

Were remedials identified by our site inspector? Yes No
 Has the phone line been checked by our site inspector? Yes No N/A

7 Installation and fee

Please choose one of the three options below

Option 1	Option 2	Option 3
Standard installation. <input type="checkbox"/>	As Option 1 but with the addition of telemetry for a chemical dosing unit, plus a larger outstation. <input type="checkbox"/>	As Option 1 but you supply and install the outstation. <input type="checkbox"/>

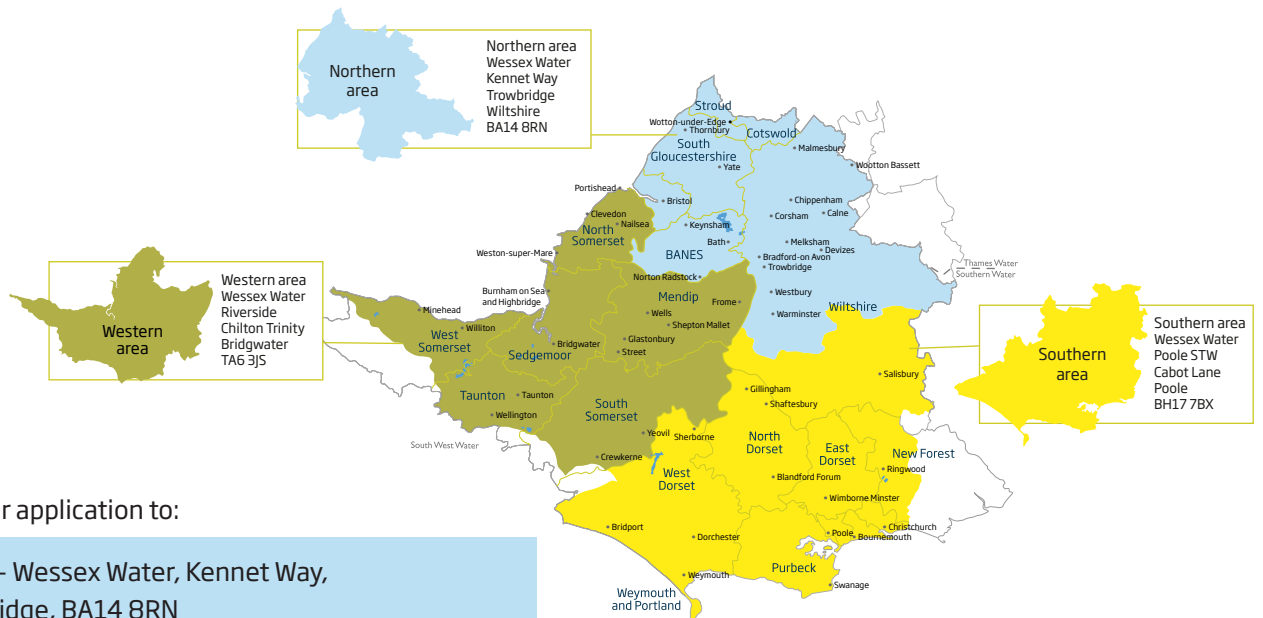

Please refer to our Developer service charging arrangements for confirmation of fees.

Standard installation includes: configuration of Wessex Water telemetry system, provision of an outstation, LPU and secondary BT socket, wiring from the outstation to marshalling box, testing all signals from source, making the site live to our control room, and issue all relevant certification.

Any additional visits or work may be charged as extra. If a BT line cannot be provided, alternative options need to be discussed. There may be an extra cost involved. We will provide more details on request.

By signing this form you confirm agreement of the order.
