

## Full Serve NAVs

We welcome early discussions with NAVs to consider on a case by case basis any efficiency savings achieved by a site being served via a full-service NAV. We intend to review each application on a case by case basis to establish what costs can be avoided as the incumbent supplier, whether it is appropriate to give credit for these avoided costs and how working collaboratively together we can realise value for both sets of customers

If you wish to discuss Full Serve NAV opportunities further, please contact our Head of Wholesale Services at the contact details below.
